What About That

There is just this much about it: Dandruff is a germ disease, is most untidy, annoying, and leads to baldness. When chronic, it is very stubborn, but surely yields to thorough and energetic breatment. All germs must be destroyed, the scalp must be restored to health. Here is the remely: Ayer's Hair Vigor. Ask your doctor about using it.

Now, however, that the union has been effected and since any do mestic loan must carry a high rate of interest, the idea of the government scems to be to give up the scheme in order to raise a big foreign loan as soon as the new Republic is recognized by the Powers.

Some changes have been carried out in the organization of the Peking gov ernment for the purpose of curtailing expenditure. The departments of the navy and army have been combined in one and the department for the administration of savage districts has been abolished. The Cabinet now consists of eight departments. Some changes are expected among the chiefs of these departments.

SURGEON'S KNIFE MAY REFORM BOY

BY THE REMOVAL OF GROWTHS IN THEIR THROATS.

The question as to whether the crimnal tendencies of children, who are constantly coming before juvenile court families, can be cured by systematic treatment or surgical operations is attracting the attention of all those who have to deal with wayward youth. Judge W. L. Whitney, in an interview yesterday, discussed the latest experiments that have been made along this line and stated that frequently more satisfactory results have been obtained in dealing with delinquents by sending them to the hospital instead of a reformatory. He said further that children often fall into mischief because of their physical condition, in which adenoids and enlarged tonsils fre-

quently play an important part.

"I remember a case" said he,
"where adenoids were removed from a boy in a hospital. The mother shortly afterwards was anxious to know what had been done to her boy as before he went to the hospital he was very mis-chievous, but afterwards he was quite changed for the better.

"On the other hand, the same surgeon operated on a particularly naugh-ty, foul-mouthed little chap, but the removal of the adenoids seemed to have no effect on his manners orr language. Moral Education.

"What is wanted," he added, "is system of moral education, Of course, some operations are followed by wonderful results, as in the case of the removal of a portion of a skull of a congenital idiot. This enables the brain to have more freedom and the

patient may become quite normal."

Happy Little Talk.

Achi made one of his happy little speeches in Hawaiian in which that the last convention reminded him of the old days of the party when he and Lane and Charlie Clark and many of the other "leaders" were at loggerheads. Now all was changed, added he, and harmony reigns. For this he thanked Mr. Shingle, who gave this luau. He said that it was now time to smoke the pipe of peace. George Davis was also strong on harmony. Davis was also strong on harmony. "The party first and the individuals next," he said. He exhorted the faction represented, not to get "sore the result of the convention, and not to bolt the party, but to stick together

and fight as a united party.

PLAN TO RAISE SHIP OF SPANISH ARMADA

ENGLISH SYNDICATE HOPES TO HAVE TREASURE GALLEON TOWED TO LONDON.

Stories of the seeking and finding of treasure are always attractive, and, though the amount of seeking is usually very disproportionate (except in ro-mances) to the finding, interest in enterprises of this character never

falls. One of the most romantic, and also, it would appear, one of the most hope-ful, of present day adventures in search of treasure is the attempt to recover the great amount of gold that is known to lie in the wreck of a large Spanish galleon, one of the vessels of the Great Armada, that was sunk off Tobermory,

This is the fourth season that a treasure-trove syndicate has brought modern salvage skill and appliance to bear on these operations. Many of the descendants of families connected with the Court of Queen Elizabeth, or be-longing to the days of the Armada, are shareholders in the salvage adventure now being determinedly carried on in the stormy bay in the northern part of the Island of Mull, in the Scottish western highlands. Among the names on the syndicate register of members are those of several of the Argyll family and of the Clan MacLean. There is also a direct descendant of the Mr. Smollett to whom centuries ago was intrusted the duty of preventing the galleon from setting sail from Tobermory. This task—doubtless a pleasing one—he accomplished with the aid of some of the MacLean's men.

Bright hopes are held of the success of this salvage venture. The latest suction pumping plant is being called in to aid; apparently dynamite is not the most satisfactory agent for clearing the mud and accumulations of centuries away from the sunken ship. But a spiral steel cutter at the lower end of the suction pipe slices up the material, and the great indrawing power of the steam pumps brings the mud, sand, clay, small stones, and shells in a constant
